### Brake Calipers – Separate Servicable Parts – Repair Policy

MODEL  
1997 MY-ON XK Range  
1998 MY-ON V8 XJ Series  
VIN  
001001-ON  
812256-ON

#### Issue:

This Technical Bulletin provides information regarding the parts that are available for the repair of brake caliper on cars equipped with standard brakes (not Brembo).

The previous policy of replacing the whole caliper assembly has been changed. To eliminate the need to replace the whole caliper assembly, it has been broken down into separate serviceable parts.

A caliper housing is now available that consists of a caliper ‘fist’, complete with pistons, seals, bleed screws, and dust caps.

#### Action:

If a repair is necessary while the vehicle is still under warranty, the caliper housing, should be replaced, not the whole caliper assembly. For replacement procedure see workshop manual, JTIS CD ROM, section: 206-03 (front) SRO 70.55.02 and section: 206-04 (rear) SRO 70.55.03.

**Note:** During the warranty period it is NOT acceptable to use seal kits to repair the calipers.

Out-of-warranty, the caliper components are available separately (see parts information) to allow cost effective repair.

**Warning:** When performing out-of-warranty repairs, use care to determine the correct versions of seals required due to the revised piston and housing used on V8 XJ vehicles from VIN F08336 and XK vehicles from VIN A04646.
