

DTC Summaries

The DTC summaries were generated to support Jaguar PDU but also provide the basis for diagnosis of OBD-related concerns using a suitable generic scan tool; it may be necessary to use these summaries in conjunction with the appropriate Electrical Guide.

Note: Electrical Guides are only available electronically from 1997 model year onwards.

The extracted code needs to be referenced against the appropriate summary which is determined from the tables below:

Note: Some codes could emanate from more than one system. Make sure each system is checked for the relevant code.

Use the find option in Acrobat Reader to locate the code within the chosen summary and navigate using the Acrobat Reader toolbar.
