TECHNICAL BULLETIN

**Extended Life Coolant (XLC) –
Identification –
Precautions**

MODEL 2000 MY-ON
S-TYPE
VIN L00001-ON

Issue:

The cooling systems of all S-TYPE vehicles are filled with “Extended Life Coolant” (XLC) which can be identified by its distinctive orange color. Identification label are mounted to the cooling system header tanks.

It is important that vehicles filled with the XLC are not topped off with coolants such as D542 or D985 used on earlier Jaguar vehicles.

Mixing D542 or D985 into XLC will seriously reduce the long-life properties of the XLC and will have a negative effect on the corrosion protection properties of the coolant.

XLC conforms to specification WSS-M97B44-D.

Action:

Ensure that only XLC is added to S-TYPE cooling systems when topping off is necessary.

Parts Information:

DESCRIPTION

Extended Life Coolant (XLC) - 1 liter
Extended Life Coolant (XLC) - 5 liter

PART NUMBER

JLM 20972/2
JLM 20972/3
