**TECHNICAL BULLETIN**

**In-Car Entertainment System –  
Tweeter Specification**

MODEL 1995 MY  
Sedan Range  
VIN 720001-ON

**ISSUE:**

1995 MY Sedan Range vehicles are available with two In-Car Entertainment specification levels. To rationalize production, all Sedan Range vehicles use the same dash top roll and rear parcel shelf regardless of In-Car Entertainment system specification level.

**ACTION:**

The following information explains the differences in tweeter assemblies (high range speakers) between the Base Sound and Premium Sound specification levels.

**BASE SOUND TWEETER SPECIFICATION**

Front – One tweeter in each side of the dash top roll.

Rear – One tweeter in each side of the rear parcel shelf.

**PREMIUM SOUND TWEETER SPECIFICATION**

Front – One tweeter in each A post.

NOTE: Tweeters are installed in the dash top roll on premium systems but are not connected to the harness. Connecting the top roll tweeters of premium sound system vehicles will seriously degrade audio performance.

Rear – One tweeter in each rear door arm rest.

NOTE: Tweeter grilles are fitted to the rear parcel shelf but no tweeters are fitted.
