Control Modules – PECUS Display Messages

Issue:
In case any of the messages listed below are displayed on the Message Center this indicates that the Control Module, (CM), referred to is not programmed correctly and must be replaced by a new PECUS programmed CM.

Each CM has a code, listed below, which will appear if a fault develops. Each code also has its own position in the Message Center display, as shown in Illustration 1.

PECUS (Programming Electronic Control Unit) always appears before this type of message.

I Instrument Pack
R Driver Rear Door Control Module
S Security and Locking Control Module
K Passenger Rear Door Control Module
DD Driver Door Control Module
PD Passenger Door Control Module
D Driver Seat Control Module
P Passenger Seat Control Module
